HYDRANTS AND DISTRIBUTION SYSTEM VALVES

- 1. Distinguish between fire and flushing hydrants by lead size.
 - a. Fire hydrants normally have a lead size of 6 inches or greater.
 - b. Record as a flushing hydrant where the lead size is less than 6 inches or if pressure is inadequate to provide fire flow.
- 2. Explain all reported adjustments in the schedule footnotes.
- 3. Report fire hydrants as within or outside the municipal boundaries.

Number of distribution valves operated during year: 627

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

For values that represent an increase or a decrease when compared to the previous year of greater than 15%, but not less \$10,000, please explain.

A/N 603 Misc exp: (\$125,633)-47.4% decrease. The 2002 expense figure was higher than normal. Annual amortization of Deferred Studies is charged to this acct per PSC authorization. The 2001 & 2002 monthly amortization amts were understated & the additions in 2002 required an adjustment to be made at year-end in order to bring it up to the required/authorized amt. The conclusion of our radium legal proceedings occurred in 2003 resulting in a lesser amt to this acct.

A/N 642 Operation labor & exp: \$12,816-20.8% increase. The increase is due to unfunded mandates on water sample testing. The 2003 actual is under the budgeted amount.

A/N 652 Maint of water treatment equip: (\$14,270)-40.2% decrease. Pumpage in 2003 was lower which resulted in less maint of equipment.

A/N 672 Maint of dist reservoirs & standpipes: (\$15,933)-36.7% decrease. The 2002 amount was higher than normal. The 2003 amount was significantly under budgeted amount.

A/N 677 Maint of hydrants: \$24,059-49.9% increase. This account varies substantially from year to year. 2003 was higher than 2002. The 5-yr average prior to 2003 was \$63,563.

A/N 923 Outside services employed: \$17,395-16.8% increase. The Utility is now working towards radium compliance. We are not deferring the costs of radium compliance in A/N 1830 as in past years.

A/N 932 Maint of general plant: \$67,138-74.2% increase. This increase was due to non-frequent roof repairs, and painting of the building's exterior. There was increased maint expenses and clean up needed in conjuction with the revisions and the creation of a new meeting room.

Property Tax Equivalent (Water) (Page W-07)

If Lower Tax Equivalent authorized by municipality is greater than or equal to zero, please explain.

The lower tax equivalent per 1994 PSC Report has been authorized by the Waukesha Common Council thru yr 2004.

Water Mains (Page W-21)

If Added During Year column total is greater than zero, please explain financing following the criteria listed in the schedule headnote No. 5.

Column e # of feet added during the year: 31,253.9' are developer installed at actual cost. 9,133.1' are Utility installed mains and/or infrastructure work.

Water Services (Page W-22)

If net additions are greater than zero, please explain financing by following criteria listed in schedule headnote No. 3.

Services installed by the Utility are billed directly to property owners after completion on the basis of the prior year's average cost of 1" copper service. In 2003, the Utility installed 47 services, 336 services were developer installed, & 16 services were homeowner installed laterals. Homeowner installed services are recorded at estimated cost.
